

Managed Microsoft 365

Build greater agility, efficiency, and productivity potential into your business with Microsoft's leading cloud-hosted collaboration, operational and storage tools. Benefit from **seamless coordination and enhanced business continuity credentials** when configured and deployed by Sentis, an approved Microsoft silver partner. All available with scalable, by-user pricing.

- ISO27001 accredited for data management
- UK helpdesk and engineers available 24/7
- Partnered with Microsoft, Dato, Veeam, N-Able and more
- Focus on driving business value from the modern workplace

Managed Microsoft 365

Benefit from integrated productivity, communication and storage apps, and an environment configured to how your business works. Enable seamless coordination across the Microsoft 365 platform to work faster, smarter and more securely. Plans licensed by user for scalability and cost control.

Microsoft Teams with Telephony

Enable anywhere collaboration with a single, intuitive platform for all business communication. Includes chat, video meetings and virtual conferences, and can function as a complete telephony function. With high availability, maximum security and 24/7 support.

Microsoft 365 Backup

Protect service availability and security posture from the effects of data loss. A third-party 365 backups solution mitigates data loss from accidental deletion, hacking and malware, intrusion attacks and departing employee access – critical areas not covered by Microsoft's 90-day cloud backup.

Microsoft Managed Cloud

Powerful business applications under one roof, all hosted in Microsoft's leading public cloud environment for business continuity confidence. Products include Windows Server, Microsoft 365, SQL Server, all popular productivity apps and Microsoft's flagship Azure platform. Subscription based for cost-effective scaling.
